

Artful, honest and timeless *imagery*.

Photography by Nimmy is a Whangārei-based photography service and small business led by Nimmy Santhosh, creating artful, honest and useful imagery across Northland and beyond. Nimmy photographs businesses, events, portraits, weddings, arts projects and creative work with a calm, grounded approach that helps people feel comfortable and lets real moments unfold naturally.

At the heart of the work is an attention to people, atmosphere and the details that give a space, event or story its character. Rather than over-directing, Nimmy focuses on what is actually happening, creating images that feel true to the people in them and useful to the people they are for. The aim is always to deliver photographs that not only show what happened, but hold onto the feeling of it too.

Photography by Nimmy also offers commercial and brand photography, professional headshots, event coverage, drone photography and selected video coverage when a brief calls for it. The work is created with promotion, storytelling, websites, social media, archives and long-term use in mind, helping businesses, creatives and organisations show up with imagery that feels polished, natural and genuinely them.
